

Mr. Tom Klein
Town Manager
Town of Avon

March 12, 2007

Dear Mr. Klein,

The below residents of Cobblestone Springs subdivision, located between US 36 and CR 100 N west of Dan Jones Road, request to have a traffic pattern study conducted to determine if Cobblesprings Drive and Springwood Drive are candidates for the traffic slowing options offered by the Town of Avon.

Cobblesprings Drive and Springwood Drive are consistently utilized by individuals, business vehicles, and busses as a "cut-through" option to avoid the traffic signal located at Dan Jones Road and US 36, especially on evenings and weekends when the traffic volume on the aforementioned streets is heaviest and the amount of children playing outside is the greatest. There are multiple families residing on Cobblesprings Drive and Springwood Drive with elementary school and intermediate school age children with multiple Avon school district bus stops.

Vehicles utilizing Cobblesprings Drive and Springwood Drive as the "cut-through" option routinely ignore the posted speed limit signs and Stop signs located in the sub-division. We have already had one instance of a vehicle/bicycle collision and are concerned the increased traffic and disregard for posted traffic signs will cause additional incidents with potentially tragic results.

The sub-division has requested increased police patrols on these streets in the past and the instances of "cut-through" and disregard for posted traffic signs decreased during these patrols only to resume after the increased patrols ceased.

The sub-division of Cobblestone Springs respectfully requests a traffic pattern study conducted as soon as reasonably possible.

Thank you Mr. Klein for your consideration of our request.

Sincerely,

Signors of this petition
